# PLASTI RIVETS / RIVIS PUSH RIVETS / MICRO PUSH RIVETS

Fastening solutions adapted to your application

**QUICK INSERTION  
WITH STANDARD  
TOOLS**

**HEAVY DUTY  
VIBRATIONS  
RESISTANT**

**CAN BE FASTENED  
ON VARIOUS  
MATERIALS**

**WILL NOT DAMAGE  
FRAGILE SURFACES**

**WILL NOT CORRODE**

These items are commonly used in various sectors of activity, such as computer hardware, electronics, automotive (automobile/motorbikes/caravans/mobile homes), furniture, workshop furniture, heating/cooling/ventilation...  
What about your own application?

Information on this document can be subject to technical modifications without prior notice. The end-user is responsible for evaluating and determining product suitability for its specific application.

**Plastic Rivets** are used to fasten a wide range of materials (wood, metal, padded fabrics, rubber...).

**Plasti Rivets** can be easily and quickly assembled. 2 versions are available: pre-driven or non pre-driven. Different colours can be supplied upon request.

**Rivis** can be adapted and disassembled quickly (with a screwdriver) and are reusable. These are mainly used for applications where it is necessary to access to an element (maintenance, after sales service). Closed-end feature acts as a self-aligning mechanism. This rivet offers a solution with a perfectly finished appearance.

**Push Rivets** can be fastened in a single pull-in or pull-out movement. Closed-end feature acts as a self-aligning mechanism.

**Micro Push Rivets** have the same properties as Push Rivets but in smaller dimensions. These are a perfect fastening solution for printed circuits or other computer components.
